

Project I Terms

Implementation and Evaluation

This is an individual project

Evaluation and Deliverable

1. Running Executable Program (Point : 75%). To demonstrate the program, a date would be reserved for program demo.

2. Documentation (Point: 25%)

The documentation should include brief manuals (how to compile and run the file, file structure, result analysis and source codes with brief explanation on every function)

Analysis part should provide at least two graphs. For example, a graph that shows the values of t_{tot} for different P and M.

Due Date:

The project documentation and source code will due on one day before final exam. The student is expected to demonstrate the project in front of the instructor. Otherwise mentioned, the projected date for demo would be between April 19 to April 24, 2018
